

Quickly and effectively removes built up emulsion polishes.

Ammonia free formulation.

Suitable for use on a wide variety of flooring types.

A concentrated, fragranced emulsion polish stripper. Quickly and efficiently breaks up old emulsion polishes for easy removal with either hot or cold water. It's ammonia free formulation leaves no unpleasant fumes, unlike traditional floor stripping products, leaving only a fresh floral fragrance after use.

Suitable for use on a wide range of flooring types including vinyl, sealed wood, sealed cork, asphalt, and most types of linoleum and rubber.

2 x 5L | BN1040

Directions for use

For professional use only.

1. Clean the floor to be stripped. It is recommended that sections are used, to avoid walking over treated areas.
2. Dilute 125ml product per L of either hot or cold water (12.5%). Apply to the floor liberally with either mop or sprayer.
Always test an inconspicuous area before use. Some types of linoleum and rubber are susceptible to colour change. Test for colour fastness before use.
3. Leave the solution to sit from between 3-5 minutes, softening the polish.
4. Apply more hot water, then scrub the floor using a nylon stripping pad via a machine or by hand. Pick up the slurry and then rinse floor.
5. Rinse the floor with fresh clean water to remove any remaining residue.
6. Neutralise the floor with a 50:50 solution of vinegar and water and allow to air dry.
