

ICE MACHINE DESCALER & ICE MACHINE SANITIZER

Description

For the cleaning and maintenance of ice machines.

2 products are available in this range

An ice machine cleaning and maintenance kit to keep your machine in perfect condition.

Directions For Use

ICE MACHINE DESCALER

Switch machine OFF at the end of a harvest cycle. Allow ice to drop from the evaporator. Remove all ice from the bin. Remove ice curtain, ice chute, spray bar and standpipe. Use Ice Machine Descaler neat. Remove nozzles from the spray bar and soak in the solution for 5 minutes (15-20 minutes for heavily scaled machines). Whilst components are soaking, spray solution liberally on surfaces to be descaled. Use a nylon brush and scrub inside the ice bin, inner door and track, sump trough and mouldings. Thoroughly rinse with clean water. Replace sump overflow and fill water trough. Replace all the removed components. Press switch to WASH position and allow to run machine for 10 minutes. Switch OFF position and remove curtain, chute and standpipe. Allow solution to drain. Replace standpipe and fill with 2 Litres of fresh water. Refit chute and curtain. Press switch to WASH position and allow to run machine for 10 minutes.

ICE MACHINE SANITIZER

Spray Ice Machine Sanitizer onto internal surfaces of the ice machine and leave for 5 minutes. Rinse thoroughly, using clean water. Discard first harvest of ice after cleaning.

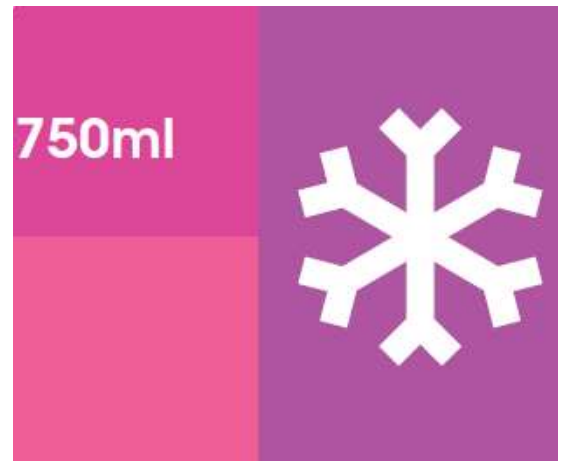

Ice Machine Sanitizer is flammable - apply in well ventilated area away from naked flame.
