

## edenclean Concentrated Enzyme Digester

### Description

A concentrated solution made with powerful enzymes blended with detergents, that work together to achieve excellent hard and soft surface cleaning. The enzymes break down odour-causing compounds, in a variety of soiling types including odours from urine, vomit and food spills.

The natural enzymes used do not stain or harm fabrics and materials that are unaffected by water.

The product can be used on soft surfaces such as carpets, upholstery and fabrics. It can also be used in carpet water extraction machines.

Due to the nature of this product, variations in colour may occur alongside potential sedimentation. This is quite normal and does not impact the performance of the product.

### Directions For Use

Shake container well before opening.

The formulation is activated by diluting with water and should then be used within 3-4 hours after dilution. Excess solution can be used to clear sinks, urinals and toilets.

For carpets and fabrics: Can be diluted 50% (500 ml per L), 20% (200 ml per L) or 10% (100 ml per L) depending on the degree of soiling. Brush well into the affected area and leave to dry, then vacuum once dry. Cover the area with damp cloth if it is likely to dry out in under 3-4 hours.

For concrete, tiles: Dilute to 20% (200 ml per L) for heavy soiling. Mop on and remove excess moisture but allow to dry naturally. Dilute to 5% (50 ml per L) for more frequent use.

### Product Codes

EDN-CED-6X1 / EDN-CED-2X5

### Storage

Store in cool conditions away from direct sources of heat.

Avoid extremes of temperature.

Do not allow to freeze.

Ensure the cap is tightly fitted after use.

Keep out of reach of children.

### Shelf Life

Shelf life 24 months, if stored as recommended. Use within 6 months of opening.

### Environmental

This product is believed not to be dangerous to the environment with respect of mobility, persistency and degradability, bio accumulative potential, aquatic toxicity and other data relating to ecotoxicity. However, do not allow large quantities of neat product to enter surface waterways.

### Notes

Packaging is made from a mix of recyclable (1L bottles) and recycled (5L bottles) materials.
